ABOUT ME

Data scientist/analyst with experience automating reporting and improving pricing analytics in retail banking. Comfortable with Python, SQL, statistics, and ML, and experienced translating business questions into measurable metrics and models. I am looking for a junior Data Science role where I can contribute, learn from peers, and grow into more ownership over time.

EXPERIENCE

Mortgage Product Data Analyst at Banc Sabadell | Sept 2025 – Present

- Built automated data refresh and transformation pipelines in Excel (Power Query) for mortgage performance reporting, reducing weekly turnaround **from 3–4 days to 1 day**.
- Redesigned a model used for mortgage product pricing decisions (month-on-month nominal interest rates), **improving model robustness and accuracy**.
- Pushed and supported **implementation of Power BI and Python workflows**, improving self-serve reporting and reducing manual analysis effort across the team.
- Improved **data consistency** by standardising collection rules across the network of offices.

Financial Service Consultant Intern at KPMG | Oct 2024 – May 2025

- Supported the validation of **credit risk models** for a Tier 1 European bank, focusing on regulatory compliance and methodological soundness.
- Regularly assisted in drafting validation reports and audit documentation aligned with the European Central Bank and internal governance standards.
- Worked full-time while completing a the Master’s program in Data Science.

Bartender at Victoria Hotel in Galway | Dec 2023 – Jun 2024

- Alongside full time Bachelor’s studies abroad, to save up for my tuition and living expenses.

Business Analyst Intern at Fundación Casa de México | Jun 2022 – Aug 2023

- Contributed to business research, trade promotion, and the coordination of bilateral initiatives between Spain and Mexico as a part of my bachelor degree in business.

EDUCATION

Master’s Degree in Data Science | 2024–2025

Universidad de Navarra – Madrid, Spain

- Coursework and projects in ML/DL, statistical modeling, Python/SQL, data engineering, and deployment (APIs/Docker/cloud), with a focus on turning real business problems into models.
- Built predictive and descriptive models across projects, including clustering, regression/classification, and time-series forecasting; validated performance using cross-validation and metrics

Bachelor Degree in Business | 2021–2024

Galway Business School – Galway, Ireland

- Developed an international perspective in a multicultural context.

SKILLS

IT Tools : Office 365, Python, AWS, R, SQL, Power BI, Tableau and Git, among others.

Libraries : NumPy, Pandas, Matplotlib, Sklearn, SciPy, XGBoost, Seaborn, PyTorch & TensorFlow

Languages : Spanish, English (C1) and French (Conversational).

OTHERS

Certifications: AWS Certified Cloud Practitioner

Courses: Degree in International Economy at Universidad de Nebrija

Kaggle: Intro to ML, Python, Pandas, Intermediate ML, Data Visualization,
Feature Engineering, Intro to AI Ethics.

Additional: European Driving License

Social Work: San Juan Bautista soup kitchen of the Order of Malta in Madrid.
